

SATYAJIT ROY

DIRECTOR OF EEC TRADING BAHRAIN

ABOUT ROY

Satyajit Roy is a highly accomplished and globally-minded professional serving as the Director of EEC Trading Bahrain. With a diverse educational background in Electrical Engineering and Economics from The Pennsylvania State University, he possesses a unique blend of technical expertise and business acumen. Satyajit's passion for sustainability and his commitment to driving positive change in the steel industry are evident through his current venture, where he focuses on decarbonizing the steel-making process using scrap metal generated from ethical ship recycling.

EXPERIENCE

With a track record of success in various roles, Satyajit brings valuable experience to his position. As the Director of the trading unit at Elegant Exit Company, he was instrumental in establishing their presence in Bahrain and played a key role in certifying shipyards for the highest recycling standards. His strategic acumen led to the creation of joint ventures between EEC Middle East and major entities in the UAE and Bahrain, fostering strong partnerships and expanding business opportunities. Satyajit's efforts to align steel mills globally to consume scrap from ship recycling demonstrate his dedication to promoting sustainable practices throughout the industry.

Prior to his current role, Satyajit held the position of Head of Product and Business Development at Skybits Technologies Pvt Limited. During his tenure, he excelled in project management, leading the development of custom AI/ML software for the largest bank of India and contributing to the enhancement of the credit approval process. His leadership skills were showcased as he guided the AI/ML development team to create innovative image-based solutions using drone feedback. Satyajit's business acumen was also evident in his role as a product manager, overseeing the successful implementation of in-house developed chat and image analysis systems. Additionally, he played a pivotal role in attracting investments for the company's growth.

ACHIEVEMENTS

As the Chief Operating Officer and Co-Founder of Go Marine Services LLC, Satyajit spearheaded groundbreaking initiatives in the maritime industry. His research on predictive maintenance for ship machinery, conducted for a major oil company's maritime division, demonstrated his expertise in optimizing operations. Satyajit's innovative proposal to employ automated drones for pilotage, corrosion detection, and oil spill detection showcased his forward-thinking mindset. He successfully implemented ISO 9001, 14001, and 18001 management systems, ensuring compliance and high-quality standards in multiple organizations globally.

SKILLS

Satyajit's early experiences as a student researcher at Penn State University and a project management intern at Det Norske Veritas provided him with a solid foundation in research, development, and quality assurance. His dedication to his field and his ability to lead and collaborate have consistently yielded remarkable results. In summary, Satyajit Roy is a dynamic and forward-looking leader with a diverse skill set and a strong commitment to sustainability. Through his experience and expertise, he is driving innovation and fostering global partnerships in the steel industry. Satyajit's accomplishments and his dedication to ethical practices make him a valuable asset as the Director of EEC Trading Bahrain.
